

SHUBHASHIS SINHA

Agentic AI Engineer | Agent Orchestration & Multi-Agent Workflows · Event-Driven Architecture · Runtime Operations · Multi-Cloud

shubhashis.sinha@gmail.com | +91-7358604077 | Bangalore, India | linkedin.com/in/shubhashis-sinha

SUMMARY

Agentic AI Engineer with **12+ years designing, building, and deploying distributed and agentic systems**, currently building enterprise agentic AI at GE HealthCare's AI Center of Excellence. I independently **design and implement complex agent workflows and multi-agent orchestration** (LangChain, LangGraph, MCP, A2A), lead **event-driven architecture**, and operate and troubleshoot runtime components for high availability and reliability. Strong on **code quality, testing, code reviews, CI/CD, Kubernetes, and monitoring/incident response** across cloud-native environments, and I mentor engineers and drive best practices. AWS-primary with multi-cloud awareness (Google Cloud, Azure), and a regulated financial-services foundation (Bank of America).

CORE COMPETENCIES

Agentic AI	Complex Agent Workflows · Multi-Agent Orchestration · LangChain · LangGraph · Google ADK (familiarity) · MCP · A2A Protocol · Tool-Calling · Memory & State · Human-in-the-Loop
Event-Driven & Distributed	Event-Driven Architecture · Microservices · Distributed Systems at Scale · Message Queues (SQS, Kafka) · Runtime & State Management · APIs · High Availability & Reliability
Runtime Ops & Reliability	Operating & Troubleshooting Runtime Components · Monitoring & Observability (LangSmith, CloudWatch, Grafana) · Incident Response · Deployment Improvements · SLAs/SLOs · Resilience
Engineering Excellence	Advanced Testing (unit/integration/E2E) · Code Reviews · Agile · CI/CD Pipelines · Container Orchestration (Kubernetes) · Docker · Technical Documentation · Best Practices
Cloud	AWS (Bedrock, EKS, Lambda, SQS, Step Functions, S3, CloudWatch) — primary · Google Cloud / Azure (multi-cloud awareness) · Cloud-Native Development & Operations
Leadership	Mentoring Engineers · Knowledge Sharing · Cross-Functional Collaboration (Engineering, SRE, Product) · Establishing Standards & Documentation
Programming	Python (Expert) · Java (working) · SQL · SPARQL · FastAPI · Git

PROFESSIONAL EXPERIENCE

Staff AI Engineer — AI Center of Excellence (Agentic Platform)

GE HealthCare · Bangalore, India

Dec 2021 – Present

Agent Orchestration & Multi-Agent Workflows

- Independently **designed and implemented complex agent workflows**, integrating frameworks (LangChain, LangGraph, MCP) to address domain requirements — ~95% task success across 1,000+ tasks/month.
- Built **multi-agent orchestration** with tool-calling, memory/state, agent-to-agent (A2A) coordination, and human-in-the-loop; filed a patent on the validation + hybrid-routing architecture.
- Led **event-driven architecture** for agentic workloads — message queues (SQS, Kafka), microservices, and runtime/state management integrating AI with enterprise systems.

Runtime Operations, Reliability & Engineering Quality

- Operated and troubleshoot **runtime components** for high availability and reliability — monitoring, observability, and incident response; drove improvements in deployment and monitoring processes.
- Ensured **code quality** through advanced testing, code reviews, and CI/CD; containerized and deployed on Kubernetes (EKS) with autoscaling and cost controls.
- Operated platforms processing **10TB+/day at 99.9% uptime**; led 500+ pipeline modernization (\$2M+ savings, 3x performance).

Mentoring, Standards & Collaboration

- Mentored **8+ engineers** and fostered knowledge sharing; contributed reusable patterns and documentation adopted across 6+ teams (~25% faster development).
- Collaborated cross-functionally with **engineering, SRE, and product teams**; guided adoption of agentic-stack components and cloud-native best practices.

Tech Stack: Python (expert), Java (working), FastAPI, SQL, SPARQL · LangChain, LangGraph, MCP, A2A · SQS, Kafka, event-driven · AWS (Bedrock, EKS, Lambda, SQS, Step Functions, S3, CloudWatch); GCP/Azure (awareness) · Kubernetes, Docker, CI/CD · LangSmith, Grafana · Git

Senior Engineer / Technical Lead — Data & AI Platform

Bank of America · Chennai, India

Oct 2017 – Dec 2021

- Built **distributed, event-driven microservices** in institutional financial services — processing 5TB+ daily with high availability, resilience, and monitoring.

- Drove **code quality, testing, code reviews, and CI/CD**; operated and troubleshoot runtime components; led incident response.
- Mentored engineers and collaborated across engineering, risk, and compliance teams in a regulated, audit-heavy environment.

Tech Stack: Python, Java, Scala, SQL · Apache Spark · Snowflake · Kafka · AWS (S3, EMR, Glue) · Docker · Kubernetes · CI/CD

Software Engineer — Data Platform

Mar 2014 – Oct 2017

T-Mobile (via HCL Technologies) · Bangalore, India

- Built **scalable, distributed data platforms** (Hadoop, Spark) across 5M+ subscribers; enterprise integration and automation.

Tech Stack: Python, SQL, Hadoop, Hive, Spark, Shell Scripting

EDUCATION

Bachelor of Technology — Electronics & Communications Engineering

West Bengal University of Technology · Kolkata, India · GPA: 8.87/10

AWARDS & CERTIFICATIONS

Sir M. Visvesvaraya Award — GE HealthCare (2024)

Recognized for building and operating production agentic AI systems with measurable impact.

Impact Award — GE HealthCare (Oct 2022, Nov 2023, Mar 2024)

Agentic platform delivery (\$2M+ savings), reusable orchestration patterns and runtime reliability across teams.

AWS Certified Solutions Architect – Associate (2025)

Patent (filed) — Validation + hybrid-routing architecture for reliable agentic AI.
